TOSOT Pular

PULAR AIR PURE AIR

Smart tech built for best house ecology
Breathing fresh air of the world

- Air flow reaching 12m
- 5 steps for air purification
- Easy to installation and cleaning
- 3D airoutlet
- Safety and reliability
- 7 fan speed
- Wide voltage range

5 STEPS FOR AIR PURIFICATION CLEAN BREATHING

STEP 1 INITIAL FILTRATION

Integral overhead filter that blocks out air-borne impurities

Removal and cleaning need no disassembly, maintaining cleanness at all times.

STEP 2 DEEP CLEANING

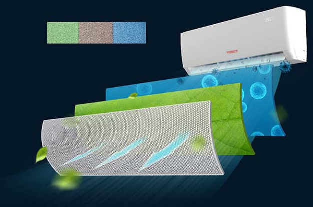
Tricolor filters can remove dust and is anti-bacterial, allowing you to breathe safely*

① Biological sterilization filter: Loaded with biological antibacterial active ingredients, it can precipitate bacterial protein and achieve excellent antibacterial effect;

② Catechin filter: Catechin, also known as "tea polyphenol", can prevent the proliferation of bacteria, etc. so as to achieve superior antibacterial effect;

③ Silver ion filter: It can contact with bacteria and react with it, which damages innate constituent or causing dysfunction of the microorganism.

*Note: Some models have this function.



STEP 3 WHOLE HOUSE PURIFICATION

Colasma air purification technology*, achieving the whole house purification by bacteria inhibition and deodorization

Release colasma > Bacteria and viruses caught by colasma > Colasma reacts with bacteria and viruses > Turn into water

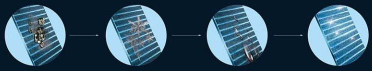
Function: Dispel bacteria attached on household items, better for beauty and health.
Purify air + kill virus + eliminate peculiar smell + inhibit static electricity + beauty effect.

*Note: Some models have this function.

STEP 4 SELF-CLEANING

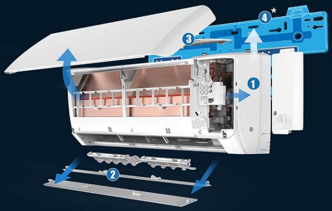
Efficient auto clean in 4 steps, healthier with pure air

Condensation→frosting and sterilization→defrosting→drying
Gree innovative evaporator auto clean technology and the process of condensing, frosting, sterilizing and defrosting enable the removal of dirt, keeping odor away and allowing you to breathe freely.



Condensation → Frosting & Sterilization → Defrosting → Drying

STEP 5 EASY CLEANING



Air outlet fully closed, dust-Free and easy to disassemble and clean

Air outlet can be fully closed, which effectively prevents dust entering; the clasp design of the air outlet makes it easy to disassemble and clean, for cleaner air supply.

*Note: Some models have this function.

ENJOY COMFORT WITH YOUR FAMILY

Air Supply Distance Up to 12m, Delivering Comfort to Every Corner

3D Airflow Around, and Comfort Everywhere in the Room

Left&right swing function available in full range of products to offer 3D airflow

7 Fan Speeds to Suit Various Needs

Fan speed can be adjusted by a remote control. Turbo fan speed can instantly change the room temperature, enabling you to feel the coolness immediately, while quiet fan speed enables you to enjoy the comfortable temperature quietly.

I-Feel, Customizing the Optimum Temperature for You Wherever

When I-Feel function is turned on, the remote control automatically sends the detected ambient temperature to the air conditioner every 10min to regulate the "temperature difference" for increasing comfort while ensuring more efficient operation of the air conditioner.

WIFI CONTROL*

Achieve long-distance control of unit on and off, temperature and fan speed, etc. with mobile phone WiFi.
